

Gally gets new property; parking problems relieved

Gallaudet's parking problem, which has been of growing concern over the past months, is on its way to being solved. The College recently acquired leases to two adjoining pieces of property, including the Plaza Chevrolet building and used car lot which begin at the corner of Florida Avenue and 6th Street and continue up past our tennis courts and garden.

The property will provide a number of benefits to the campus community, chief among them parking spaces to take the place of the Auditorium parking lot, which will soon be eaten up by construction on the Auditorium and Field House. The Transportation department will also soon be moving its vehicles to the new property.

Learning Vacation, Day Camp need toys

Six 10-day Learning Vacations, each planned for 15 families with deaf children, will be jointly sponsored by the Gallaudet College for Continuing Education, MSSD and KDES at Gallaudet.

For several hours each day, hearing children will be in supervised recreational and "fun" type learning activities, while the deaf children are in class. Children from the Learning Vacation families under the age of two will be babysat. Children and parents usually will be separated from 9 a.m.-noon and from 1-3 p.m., although on occasion parents will observe their children in classrooms.

Teenagers will have their own program. While their younger siblings are participating in learning and recreation activities, the older children, under supervision of an experienced leader, will participate in a lively recreation and learning program of their own. They will also be offered informal sign language instruction and have informal group discussions on being a sibling to a hearing impaired child.

Again this summer, the Kendall School and Continuing Education will sponsor a Summer Day Camp for children of

faculty, staff and students. The Day Camp will be for children age three (toilet trained) to 13. It will be open from 7:15 a.m. to 5:15 p.m. Mondays through Fridays, June 9 to Aug. 15, excluding July 4. Cost will be \$18 per week. For two or more children in the same immediate family, cost is \$30 per week. Children are welcome on a part-time or hourly basis, also: the charge is a flat 60 cents per hour per child.

Those of you with children ages five to 12 can also participate in the children's summer recreation program run by the PE Department, July 1-25. The Day Camp staff will pick up and deliver your child to the recreation program.

The Day Camp will be directed by Ginny McGrew, assisted by John Mihall and a staff of about 10 other persons.

You can help make these programs more successful by donating used but usable toys to help in the care of the children. If you have such toys, including wheeled toys, records, books and games in good condition and would like to donate them, please bring them to Room 206, College Hall.

Gallaudet's new property begins at the intersection of 6th Street and Florida Avenue.

Sculpture loaned to National Gallery

Gallaudet's newest commissioned sculpture, a massive nine-foot-high work by well-known contemporary artist Jules Olitski, has found a temporary home at the new East Wing of the National Gallery of Art.

The sculpture arrived by truck at the National Gallery on May 9 and, with the Gallery's marble masons and sculpture crew standing by to help, was lifted off the truck by a large crane and placed on the lawn of the East Wing. It's now on view at the corner of NW 3rd Street and Madison Drive, just off Constitution Avenue across from the Capitol.

The sculpture will be on loan to the National Gallery for about a year. When the new Learning Center opens, the sculpture will be moved to the area between Hall Memorial Building and the Learning Center.

Bruce Gitlin, fabricator of the sculpture,

flew down from New York for the installation. Also on hand were J. Carter Brown, director of the National Gallery; E.A. Carmean, curator of 20th Century Art; and Judy Bortner, Gallaudet's special projects manager.

Gitlin, who does most of the fabrication for contemporary sculpture today, put the piece together in his Brooklyn, NY factory based on Olitski's design, and worked closely with Olitski over a four to five month period. Although it's too heavy to weigh as a whole, Gitlin estimates that the large outdoor sculpture weighs about 4500 pounds.

The sculpture, entitled "Contraposto," is made of cor-ten steel, which develops a natural rust patina. After the piece was fabricated, it was "aged" outside for six months to let the rust further develop. The sculpture will continue rusting for three years. Cor-ten is a self-maintaining material; if it's scratched, it will eventually heal itself and rust over again.

Gitlin's company, Milgo Art Systems, is the largest fabrication company in the world and works with many of the leading artists in the world today. Gitlin, in fact, was the fabricator of some of the first large sculptures that were built instead of cast. He has done more than 6,000 pieces around the world and even fabricated the only piece of sculpture on the moon, a six inch tall aluminum man called the "Fallen Astronaut."

Olitski is well-known for his paintings as well as his sculpture. The East Wing has one of his paintings, and another Olitski sculpture is on exhibit at the Hirshhorn Museum.

Gitlin says he plans to do more pieces with Olitski in the future.

The commissioning of the sculpture for Gallaudet was made possible through a grant from the National Endowment for the Arts, matched with funds from other private corporations and individuals.

The Olitski sculpture is lowered into place on the lawn of National Gallery's East Wing.

Among Ourselves

On April 9 Carol LaSasso presented a paper to faculty and staff of the Hawaii School for the Deaf entitled, "Readability and Comprehension Assessment of Deaf Students."

Orin Cornett, the inventor of cued speech, will be the focus of a press conference at the National Centre for Cued Speech in London on May 14. The official opening of the new premises will be held at this time.

John Raymer and Jo Anne Simon from Student Special Services presented "A Model Program for a Residential School" to participants at a one-day workshop entitled, "Meeting the Needs of Our Visually Impaired Students," sponsored by the Maryland School for the Deaf in Frederick on April 18.

The March issue of *Deaf American* has an article by Bill McCrone of the Counseling Department entitled, "Employment Opportunities for Deaf Workers." The *American Annals of the Deaf* will also soon be publishing an article by McCrone entitled, "Responding to Classroom Behavior Problems Among Deaf Children."

Cathy McCrone of the Department of Learning Resources also had an article published in the *Deaf American* entitled, "Article Belittling Deaf Mothers Causes Furor."

Norman Tully, chairman of the Department of Counseling, has been working as a consultant at the National Association of the Deaf one day per week. He also served on the Peer Review Team for RSA April 21-22.

Roger Beach, an instructor with the Department of Counseling, and Martin Noretsky, an instructor with Educational Technology, gave a presentation at a symposium on Research and Utilization of Educational Media for Teaching the Deaf in Lincoln, NB in April. Their presentation described the media developed to instruct the course, "Freshman Orientation to Career Development by the Counseling and Placement Center."

Marita Danek, assistant professor, RSA Training and Rehabilitation Counseling, recently attended a workshop on the Application of Personal Computing to Aid the Handicapped at the Johns Hopkins University Applied Physics Lab.

Students prepare for their trip home following their finals and the end of classes.

Property

continued from page 1

By June, we will have lost 320 parking spaces due to the new construction on campus, explained Jerry Lee, assistant vice president for Business Affairs. It has always been a Gallaudet policy to provide parking places for every member of the faculty and staff, and students. Although the College will continue to encourage carpooling, said Lee, "it's difficult for our people to carpool to the extent that you can to downtown because we're all spread out."

The newly-acquired 6th Street property can probably hold about 200 cars, said Lee, and together with the present 6th Street parking lot, across the street from the new property, we will be able to accommodate 350 cars. Parking spaces on the new property will be ready for use next fall. Since we are also gaining about 170 parking spaces with the new Kendall School, this should be enough to get us through the next couple of years. When the Field House is completed, it will include additional parking space.

Although we may even experience a slight excess of parking spaces, said Lee, it is projected that our enrollment will increase and so will the faculty and staff on Kendall Green.

Acquisitions of the new property means, among other things, that we will not need to remove our tennis courts and gardens, an option that had been considered in light of the parking problems on campus.

Gallaudet's first step in acquiring the property was to take over the leases from S. George Poling, owner of Plaza Chevrolet. Poling approached the College after he decided to relocate his business to the Maryland suburbs. He held leases both to the large piece of property, including the building, owned by Appleby Estates, and a smaller acre-large adjoining piece of property owned

by E.R. Eaton, Inc.

The College began in March to negotiate taking over Poling's leases and vehicle repair equipment. Since the leaseholder has the first option to buy the property, the College then negotiated with Eaton to purchase the smaller piece of property and will soon start negotiations with Appleby to buy the larger piece of property as well.

Cost of taking over the leases and equipment was \$175,000. The leases include both the right to use the property and the option to buy. The College is purchasing the Eaton property for \$318,000. This is \$7 a square foot, and the average price of property in this area is about \$8.56 a square foot. The price the College would have to pay for the Appleby property is still unknown; the next step is to have that property appraised before negotiations begin. If the College does not buy that property, Gallaudet's lease still runs through December, 1981.

If negotiations are successful, said Lee, Gallaudet expects to pay for the leases and property with unobligated year-end funds and also by working out a mortgage arrangement with National Security and Trust.

Benefits of the property to the College include:

- Eliminating our parking problem and continuing to provide free parking to the campus community.
- The opportunity to use the garage for our Transportation Department. Now in the temporary building behind the tennis court, the Transportation Department plans by next week to begin moving its vehicles to the new property. We also now take care of all Pre-College transportation, which used to be done by Metro.
- Getting College vehicles, as much as possible, off campus. We have about 88 College vehicles that can be kept in and around the building. This will help make the campus more pedestrian.
- Improved campus security. Since we will now have access to the perimeter of Gallaudet's campus, security will be improved. Plans are being made to install new lighting and fences.
- Property value. The return on the investment in the property to the College, in the long run, will be valuable.

It is also hoped that more storage will be done on the new property.

Before next fall, all parking on the Gallaudet campus will be re-zoned. The Parking Committee is already working on the re-zoning, and one planned change is to expand the C (yellow) zone parking, moving its boundaries back to create more C-zone spaces around the HMB area.

Commented Lee about the new property, "Our parking situation looked very, very bleak back in March. It doesn't now."

Sponsored R&D

Grant/contract deadlines

Provided below are application deadlines of selected federal programs that offer potential grant or contract opportunities for faculty, staff and graduate students. More details can be obtained from Glenn Pfau, director, Office of Sponsored Research, x5030 (Voice or TTY).

Deadline	Program
06/13/80	NIHR/OHDS—Deafness Rehabilitation Research and Training Center Program
06/15/80	NEH—Consultant Grants
06/30/80	USOE—Community Education Program
06/30/80	NIE—Educational Research and Development
06/30/80	NIHR/OHDS—Research and Training Centers on Aging, Mental Illness, and Independent Living
07/01/80	NSF—International Travel Grant Program
07/01/80	NEH—Higher Education Grants: Regional and National
07/15/80	NSF—Science for Citizens Forums, Conferences, Workshops, and Planning Studies
07/15/80	NSF—Unsolicited Research Proposals for Materials Research Laboratories
08/01/80	NSF—Measurement Methods and Data Resources
08/19/80	NSF/NIE—Development and Research in Mathematics Using Information Technology
09/01/80	NSF—Science in Developing Countries
09/01/80	NSF—History and Philosophy of Science

Weekly program highlight

The National Academy, within the Division of Public Services, submitted a proposal on April 30, 1980, to the Law Enforcement Assistance Administration (LEAA). The proposal, entitled, "Victim/Witness Project for the Handicapped," suggests improving the access, services and participation of handicapped persons in the criminal justice system when they become victims or witnesses of a crime. To achieve this, the project will focus on developing and disseminating information to victim/witness service workers and to handicapped individuals. The project, to run for one year beginning in the fall of 1980, focuses specifically on the severely hearing impaired persons and handicapped persons with other communication disabilities, severe visual impairment and mobility impairment. The proposal points out that handicapped individuals are in many cases vulnerable targets for crime victimization because of reduced ability to detect or escape danger. Since many handicapped individuals in general, and deaf individuals in particular, feel that the law enforcement and criminal justice systems are inaccessible to them, they lose the opportunity to receive greater protection, redress and needed services following a crime. The National Academy is seeking \$49,901 from LEAA with Gallaudet contributing \$17,513, for a total budget of \$67,414. For more information on this proposed project, contact Virginia G. Cowgell, Project Director, x5030 (Voice or TTY).

The American University Library has recently installed a C-Phone and can receive calls from deaf individuals at 686-2325. Gallaudet students are welcome to use the facilities at the AU Library, and graduate students with Consortium cards can borrow books.

Gallaudet's new property adjoins the campus. You can see Faculty Row in the background.

Resolutions passed at CEC convention

Several representatives from Gallaudet College and school programs for the deaf were very much involved at the Council for Exceptional Children Convention held in Philadelphia, PA April 21-25 of this year. About 12,000 persons were present at the convention.

Gallaudet sponsored a reception for educators interested in the hearing impaired which attracted about 70 people. Gallaudet also had two booths in the exhibit area: one on the Gallaudet Press /Signed English publications and the other on the Gallaudet Pre-College Programs.

Two resolutions passed at the CEC Delegate Assembly are of major interest to us. One resolution charges CEC to ensure accessibility to its programs and functions for all handicapped people, the ways and means to be recommended by a two-year ad hoc committee. This was the result of an impromptu caucus at CEC involving Ron Anderson, a wheelchair person and former student CEC president, and deaf persons: Robert Davila, Dr. and Mrs. Vic Galloway, Dr. and Mrs. Harvey Corson, Ramon Rodriguez, Tracy Harris and Roz Rosen.

The other resolution, entitled, "Least Restrictive Environment and Quality Educational Program for Exceptional Children," was proposed by Roz Rosen and Tracy Harris. Harris has just started employment at Gallaudet as a public policy coordinator at the National

Academy, and her involvement with CEC has been of a long-term and intense nature. She has just completed a term as the president of the national student CEC and has, in this role, served on the CEC Board of Governors.

In response to a 1979 resolution against separate facilities, Rosen and Harris proposed a counter-resolution, which was modified in a committee of the Board of Governors with assistance from Corson, Galloway and Weintraub, and then referred to the Delegate Assembly, where it was unanimously passed.

In essence the resolution says:

CEC chapter proposed for Gallaudet

A Gallaudet chapter of the Council for Exceptional Children, a national organization with approximately 60,000 members interested in special education, has been proposed.

This organization has served as an architect for P.L. 94-142 (Education for All Handicapped Children Act of 1975) and is very much involved with training and advocacy related to the rights of handicapped children. The focus generally is on information and activities geared to mainstreaming and public schools.

The involvement of and input from professionals in the field of education of the deaf has been minimal in CEC thus far. The proposed Gallaudet chapter would provide a structured mechanism for assuring voice and involvement in

1) "Least Restrictive Environment" means an appropriate educational environment; 2) Mainstreaming is not an absolute goal; 3) All placement alternatives must be maintained and strengthened; and 4) Special schools have a place in the overall educational delivery system.

The resolution is considered to be a significant step in reinstating that placements and support services must be appropriate for individual handicapped children, and that special schools must be available as one viable option on the continuum of placement alternatives.

national policies, practices and functions of CEC. The establishment of a Gallaudet CEC Chapter will mean one delegate at the CEC Delegate Assembly during its annual conventions.

To form a chapter, at least 15 CEC members are needed. If you are already a CEC member, please let us know. If you are interested in becoming a CEC member, you will be provided with information. Fees are \$25 a year for regular membership and \$16 for student membership and include subscription to three different CEC publications.

Please call Roslyn Rosen (x5046) or Tracy Harris (x5480) by May 30. A meeting will be scheduled in the middle of June to discuss further the possibility and desirability of a chapter at Gallaudet.

A grand goodbye

Dean of Student Affairs **Richard Phillips**, who is retiring from his position after this semester, was honored for his 28 years of service in the Division of Student Affairs with a party May 10. About 300 persons turned out for the reception, dinner and program. A highlight of the evening was a series of vignettes involving members of Phillips' Class of 1940, reminiscent of Phillips' college days through the present. At left, Phillips arrives as a prep student, complete with large hearing aid, and is admonished by Hal Domich, another member of the Class of 1940. Other classmates include (right) Hortense Auerbach, Rex Lowman, Domich and Leon Auerbach, who acted as emcee. The Gallaudet Dancers performed and afterwards taught the male members of the Class of 1940 to disco. The affair was arranged by Mary Lou Holden and Phillips' office. Phillips originally came to Gallaudet as a guidance counselor in 1952, was made Dean of Students in 1954 and Dean of Student Affairs in 1969. Beginning in August, he will transfer to the Department of Counseling as its chairperson.

Personalities

Ralph Perrino is the new operations analyst with Contracts and Operations. His area of responsibility will include operations analysis and improvement, insurance (except for employees), contracts and special projects. He was recently awarded a Masters of Public Administration from George Mason University and has been employed in a management position at the Arlington Hospital.

Perrino

Shaewitz

Maryte Shaewitz is a new secretary in the President's Office. She has a BS in Library Science and has previously worked as a secretary for the U.S. Dept. of Geology.

Rodriguez

Johnson

Muriel Rodriguez, a Security officer for the past two years here, will now be devoting her attention to occupational safety and fire prevention activities. She will be assisting with fire safety inspections, accident investigation and follow-up and safety education. Rodriguez has taken occupational safety and fire prevention courses at Northern Virginia Community College and is currently working on an associate degree in Security Administration.

James M. Johnson is a plumber with the physical plant. He has previously worked as a plumber and backhoe operator.

Wick

Kelly

Linda Lou Wick is assistant librarian, technical services with the College Library. She has a BS in Library Science and previously worked with the University of Toronto, Canada Library.

Paul Kelly is a marketing specialist with Gallaudet College Press and will be marketing the books and other press publications. He was previously a sales and marketing representative for Oxford University Press.

Smithsonian's summer program

The Smithsonian Institution's Special Education Program will be providing a variety of exciting experiences for hearing impaired children between six and 12 years old during the summer.

Beginning July 7, the program will offer three one-week sessions. Children will make drawings from observations at the zoo, go beachcombing at the Chesapeake Bay Center for Environmental Studies and create sculptures, among other things.

The first session (July 7-11) will be open to six and seven-year-old children; the second session of classes (July 14-18) will be for eight and nine-year-olds; and the final session will be for 10 to 12-year-olds. Classes will be held Monday through Friday from 10 a.m. - 1 p.m. The teacher

will use total communication during class sessions.

Classes are all free, but parents must provide transportation to and from the Arts and Industries building at 900 Jefferson Drive (on the Mall) in DC.

There will be a limit of eight children in each group, and classes will be filled on a first-come, first-served basis. Applications must be returned by June 20.

For applications or more information call Janice Majewski at 381-4411 (TTY) or 381-4412 (voice).

Watch it!

"The Baxters," a prime-time television show on ABC's WJLA-Channel 7, will be open captioned this Saturday night, May 24.

Money Talks

Budget flexibility

by Paul K. Nance

When Gallaudet submits its budget request to federal agencies and the Congress, the request includes funds anticipated from the private sector as well as from the federal government. The federal government requests that Gallaudet spend the funds approved in the budget for the general purposes for which the funds were requested. This is certainly a reasonable request and it does give Gallaudet a limited degree of flexibility within the framework of general purposes. Within this limited degree of flexibility, Gallaudet has always made certain that any funds requested for salary increases be used precisely for salary increases as a part of a creditable obligation to the faculty and staff of the institution.

Nonetheless, Gallaudet does exercise a limited flexibility in other areas as a part of a prudent use of funds concept. For example, let us assume some hypothetical circumstances. Gallaudet could have an exceptionally mild winter and a rather cool summer, making some funds available in the utilities account (of course, the reverse could happen also). If it becomes evident that some funds might be available under this circumstance, the Physical Plant would notify the president of Gallaudet through appropriate channels that a certain amount of money was available. At the president's discretion, this money could be used for other purposes.

poses.

Another illustration could relate to an instructional division. The original budget plans anticipated a distribution of student enrollments in a specific way by subject discipline. The actual distribution was somewhat different. The vice president in charge could make the appropriate budgetary adjustments. Still another illustration might be helpful. Gallaudet might have a pressing need which was not anticipated in the budget. The president could ask each vice president to share in a small way to help support this need. The limited flexibilities illustrated above would be in response to the concept of prudent and practical use of funds.

HEW in past times (and, no doubt, the Department of Education will continue the practice) has asked Gallaudet to go through a re-evaluation of the use of funds in the budget base (e.g., 1979 before asking for 1980 funds) to examine ways of making better use of funds in the budget base before asking for additional funds for the ensuing fiscal year. This is a very practical type of flexibility and is certainly a reasonable expectation.

Thus, Gallaudet has about as much flexibility as it should have in the budget to meet the more critical needs of the institution. The institution does have an obligation to keep faith with the supporting publics, and the obligation is taken seriously by those who manage the institution's budget.

Gally's attrition rate is 15 percent.

by Paul K. Nance

During the fiscal year 1979, ending Sept. 30, 1979 Gallaudet has 1,164 authorized permanent positions as shown in budget documents. During the calendar year 1979, ending Dec. 31, 1979, 175 persons out of the 1,164 authorized positions separated from Gallaudet. This was shown in Standard Form 2807 entitled, *Register of Separations and Transfers*, U.S. Civil Service Commission.

The above 175 persons who left Gallaudet represent 15.03% of the total authorized positions. Out of the 175, 154 left because of resignation, 16 because of termination, four left to retire and one died.

The above information means that approximately one out of every seven permanently employed persons left Gallaudet during calendar 1979.

TV show rescheduled

The April 21 telecast of the Center for Unique Learners on Channel 7's "A.M. Washington" was postponed at the last minute. It is now rescheduled for Friday, June 6. The show will feature Dr. Nancy Dworkin, director of the Center for Unique Learners in Rockville, MD, who will speak about learning disorders in adults and children.

The June 6 show will be broadcast live and Dr. Dworkin will be answering phone calls from the audience. The program will be interpreted by Jo Anne Simon of Student Special Services and a TTY will be available for hearing impaired viewers to voice their concerns.

Darnese Hines is a secretary with Purchasing.

Midge Kahl is an administrative secretary with Research.

Fourth Therapeutic Recreation Symposium schedules May 29

The Fourth Annual Mid-Eastern Symposium on Therapeutic Recreation will be held May 29-31 in Washington, DC. The Symposium will offer a varied program for professionals involved in improving the quality of life for special populations through recreation.

The program will focus on special populations, program environments, program management, activity programming and professional issues such as credentialing, related disciplines, legislation and advocacy. The populations served include sensory impairment, mental health, aging, mental retardation, physical disabilities, multiply handicapped and corrections. Program environments for recreation with these populations include institutions, nursing homes, community, transitional and sheltered.

A resource room will be available at the Symposium to provide materials on current films, publications, therapeutic recreation programs and bibliographies. For more information you can call 454-2930

Chess team to go to world championship

The United States has been invited to send its deaf chess champion and its delegate to take part in the VII World Individual Championship of the International Committee of Silent Chess and the XV ICSC Congress, to take place in Amsterdam June 1-15, 1980.

The National Association of the Deaf Committee on Silent Chess is seeking contributions to help cover the expenses. All donations will be acknowledged and are tax deductible if checks are made out to:

NAD Committee on Silent Chess
Emil S. Ladner, Chairman
2828 Kelsey St.
Berkeley, CA 947405
or write to:
Russell Chauvenet
11 Sussex Road
Silver Spring, MD 20910

Any surplus contributions will be held in reserve toward expenses of the United States Deaf Chess Team expected to represent us in the World Team Championships to be held in Spain in 1982.
